

My participation in the FEM mentoring and job placement program has been a critical part of the current success in my career. With the guidance and support of FEM Director Jeannette Robert, I am currently employed full time with a successful staffing firm, where I had completed my original placement.

Without the FEM program, I would not be where I am today, and certainly would not be on the path to a rewarding future in Human Resources.

I recommend the FEM program to any young woman who wants to grow professionally and personally while learning real world skills in a supportive and motivating environment.
